Intro To Web Development
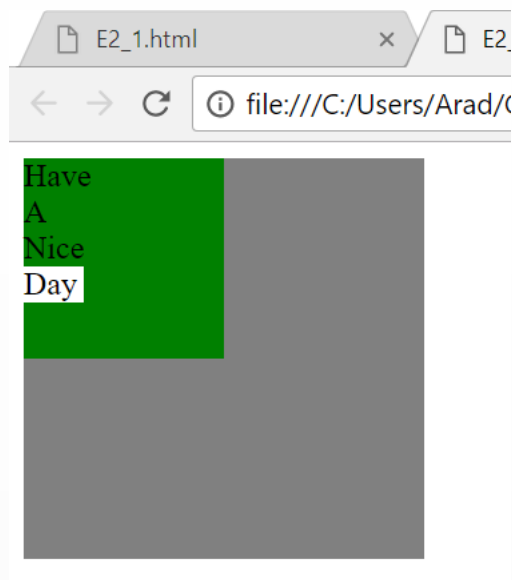

Ex2 - CSS

Part A – Basic CSS

1. Create the following page (the squares are "div" elements) :

2. Create a page with 3 <h1> Tags :

- The two of them are with the width of the page and the third one is the width of half of the page.
- The second tag is with white color, whereas all the other are in red.

  Declare all the styles in <u>the page itself.</u>

Hello

Good Bye

Thank You

3. You build a web site. The font in all the tables should be at BIG size and in red color.

Create 2 pages. Each page will have a table (2*2) with some text.

The second page page will also have a textbox. This textbox should ALWAYS have the

same background color as the table in the same page (Use classes)

4.

Create a table with 1 column a 3 rows. All Rows have the same images with the <u>same height</u> but with <u>different width.</u>

Make the second row disappeared (with OUT deleting it)
